

AccuRing HT Series

Saturn's AccuRing™ HT Series consists of high-quality casting rings designed for use in traditional Hot Top Casting molds. Like all Saturn products, the HT Series was developed by aluminum industry veterans and graphite manufacturing experts. Saturn stocks specific graphite grades for the HT Series that assure top performance at the casting pit.

Features

- Uniform flow characteristics
- Precision manufacturing
- Unsurpassed quality
- Global sales, support and service

Benefits

- Lower casting costs
- Long life
- High casting recoveries
- Consistent performance
- Predictive casting ring replacement
- Less scrap

Ordering Information

Saturn will work with you to determine dimensions and optimal graphite material. Measurement procedures are available online or from Saturn representatives.
